

## **Evan Hackel Program**

### **“Better Together”**

There's no doubt one of the biggest opportunities available in organizations is one of organizations working together better, acting like a team and executing at all levels. Yet dysfunction gets in the way of success, individual agendas take precedent, communication is a major issue in the elusive synergies of effectively working together are lost. In this keynote address we tackle these issues head on, we work on changing the culture and thought process of the attendees. We focus on the benefits of everyone working together, we define the responsibilities scratch that that each team member has not only to the organization but to other team members.

As part of this keynote we do an interactive game that highlights the power of teamwork, in a clear and powerful way. The game is fun, the impact is real and participants will be talking about it for years. The gameplay is critical aspect of the presentation, as it enables participants truly visualize and understand the importance of working together and why they're better together.

There's an optional workshop they can be added to the keynote where the attendees define the roles and responsibilities of all members of the organization.
