

## **Connie Dieken AV & Room Requirements**

- Headset microphone preferred. (or wireless lavalier) Connie always wears a belt to hold the battery pack.
- Connie brings her own Mac laptop with a set of adapters to easily plug into any system.
- It's a multi-media presentation, so we'll need house sound to hear the audio from the video clips.
- She'd like her laptop on the edge of stage instead of back in the video village so that she can control the tightly sequenced clips.
- No podium necessary.
  
- Please be aware that Connie likes to walk into the audience for a small part of her keynote so for that she'll need a hand microphone available.
