

Troy Hazard AV Requirements

Troy does not require PowerPoint or rely on video. His only requirements are a wireless, lavalier microphone as well as two flip charts and extra-thick markers in a variety of colors. If Troy is facilitating a workshop session, we suggest that the room be set with roundtables in order to encourage and foster dialogue. Two handheld wireless mics and mic runners will be needed for workshop sessions.

Troy likes to move around a lot so please either position the podium to the side of the stage or remove it all together. Easily accessible stairs to allow Troy to move among the audience are also requested.

A handheld wireless mic for the introducer is also recommended.
